The TWINSAN Hand Disinfectant is designed for vicinity (e.g. Medical, Public, Food, and Laboratory Areas) which has an increased risk of transmission, development of bacterial and virus like pathogens. Due to the quality of the TWINSAN, it is suitable to use in any environment frequently populated with people. Whilst placing your hands in the disinfectant Zone, the dispenser spouts within the sensing range and disburse further by rubbing the hands together. The Pull-out stainless steel drip Tray collects any surplus squirt residue and guarantees easy cleaning..

A Container of up to 5 Litres is intact with the Product for the Vicinity where the consumption will be high and the product will be used frequently and repeatedly. The TWINSAN Hand Disinfectant is available in both powered by batteries and plugged-in mode. TWINSAN weighs 9.5 kg without the Floorstand and with the Floor-stand the product weighs 28.5 kg. The TWINSAN dimensions are 395 (h) x 270 (w) x 265 mm (l) and the centre of disinfectant unit is at a height of 105 cm from the base. Other condition: Promotional Prices valid until 30th Sept 2020 subject to change in raw material prices; delivery within 4 to 6 weeks once the order is in place; availability of raw materials. The mentioned Price herein are without delivery costs.
